

## **Ather Grid now live across Mumbai**

~10 fast charging stations across Mumbai

**Mumbai, 06th April 2021:** Further to the opening of the Ather experience center and beginning deliveries of the Ather 450X in Mumbai, Ather Energy has set up its fast-charging public network - The Ather Grid, across Mumbai. 10 Charging points are already live across key hotspots in the city - Linking Road, Goregaon, Andheri, Fort, etc.

By next year, Ather Energy will have a minimum of 30 fast-charging points across Mumbai. Ather Energy has partnered with Park+ to set up EV locations in Mumbai. Park + is a smart parking solutions brand that allows users to locate parking, book slots & pay digitally. Ather Energy will continue to partner with more progressive hosts which can offer EV owners easy accessibility, curb range anxiety, and ease the adoption of electric vehicles in Mumbai. Ather Energy is also working with Co-operative Housing Societies & Owners' Associations to help Ather owners in setting up home charging solutions in their apartments and buildings .

Ather Energy has set up 128 public fast-charging points across 18 cities in India. The fast charging network can be used by all electric two-wheelers and electric four-wheelers and this facility is being offered free of charge to everyone till the end of September 2021.

The charging network is supported by the [Ather Grid app](#) which allows all EV owners to locate and check the availability of the nearest charging stations in real-time. Ather Energy in its accelerated expansion phase targets to set-up 5-6 points before delivery across the 27 markets that Ather will be present in by Q3 of 2021.

### **Quote by Ravneet Phokela, Chief Business Officer**

“Ather Grid has seen steady adoption across all the cities we have begun deliveries in and we believe that accessible charging infrastructure is critical before launching our products in any market we enter. We have already signed up with multiple partners and will continue to do so in the months to come. Park+ has also been instrumental in finding us locations in Mumbai and increasing our reach.

What the market needs right now is more visibility of the charging infrastructure. With increased visibility comes mental comfort, curbing range anxiety. We do not need the density like petrol or CNG gas stations but increased accessibility and faster-charging speeds. We will ensure

that Ather Grid is present in prominent locations to build confidence amongst our consumers. I feel proud to be part of the team that is building not just a high performance scooter but also building a supporting ecosystem with it. With the infrastructure now up, we expect to see a lot more of Ather 450X in Amchi Mumbai.

**Quote by Amit Lakhotia – Founder, Park+:**

“We are delighted to partner with Ather Energy, one of India's most fast-growing manufacturers of innovative EVs to take this step towards the growth of environment-friendly mobility in India. We have already installed 20 chargers across cities and will expand this number to 30 by April. By bolstering the charging infrastructure set-up in a faster, more hassle-free way, we are looking forward to the accelerated adoption of EVs in the country.”

**About Ather Energy:**

Ather Energy, one of India's first intelligent electric vehicle manufacturers was founded in 2013 by IIT Madras alumni, Tarun Mehta, and Swapnil Jain. It is backed by the founders of Flipkart -Sachin Bansal & Binny Bansal- Hero Motocorp and Tiger Global. Ather Energy launched India's first truly intelligent, electric scooter - Ather 450 in 2018, followed by their new flagship offering Ather 450X in 2020. Ather has also installed a comprehensive public charging network, Ather Grid, designed and built in India. With 128 charging points across India, Ather Grid is one of the largest fast-charging networks for electric vehicles in the country. The company's product line has won 37 awards in design, automotive and technology categories. With over 60 Indian and international patent applications, 109 trademarks and 118 Indian and International design registrations to its name, Ather Energy aims to provide consumers with the best possible ownership experience. Ather Energy currently operates in Bangalore, Chennai, Hyderabad, Pune, Ahmedabad, and Mumbai and will expand to a total of 27 cities in 2021.
